

Cordless Vacuum Cleaner

Dyson DC18 Slim corded (20 years old) started malfunctioning although it worked excellently until now. Thinking the exponential advancement of batteries, I adopted a cordless vacuum cleaner (Klarpul KL003) with two batteries which is light weight with superb handling compared to existing heavy corded vacuum cleaners.

Klarpul KL003 Cordless & Dyson DC18 Slim corded
(Upright occupies narrow storage space. Smart.)

Bissel Zing corded canister
(Big storage space is required. Not smart.)

Vacuum Cleaner	Cord	Weight
Dyson DC18 Slim	Corded (AC 120V)	15 lb
Bissel Zing		10.7 lb
Klarpul KL003	Cordless (Battery)	5.7 lb

Roller brush with long wand

Roller brush with short wand

Hair brush without wand
(Connection of hair brush with wand is possible.

Sponge Filter X1

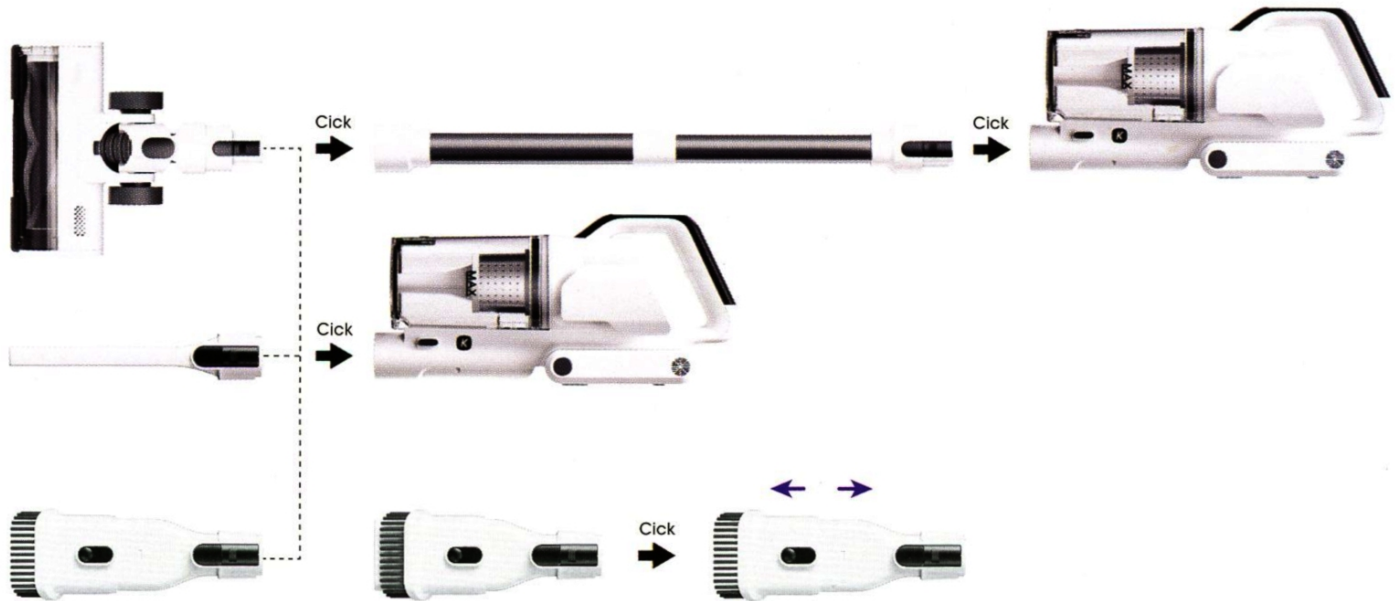

K

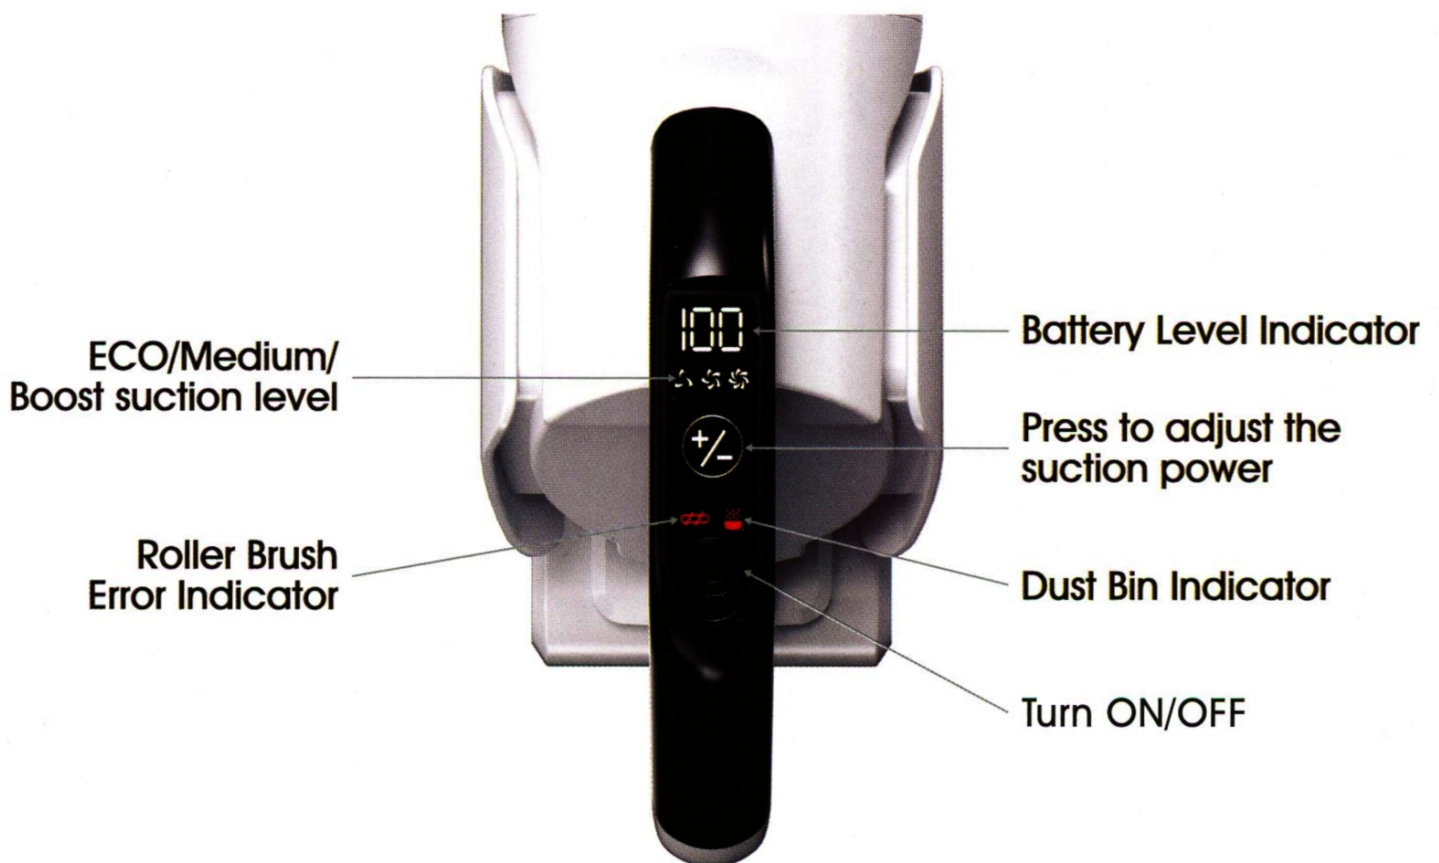

Battery Pack X2

Quick Start Guide

1 How to Install the Accessories

2 How to Start the Machine

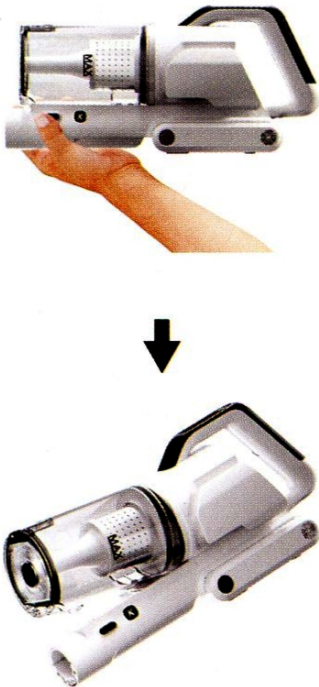

3 How to Empty the Dust Bin

1. Hold the dust bin over the trash can
2. Press Dust Cap Release Button to open the cup door, then dump out all dirt and debris

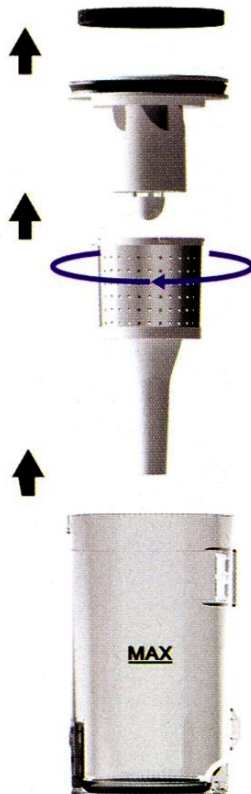

4 How to Clean the Dust Bin and Filter

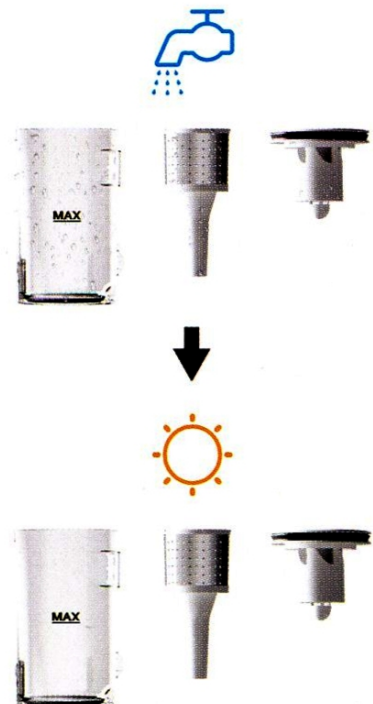

1. Press the dust bin release button to take off the dust bin.

2. Remove the Metal Filter from the top of the dust bin, and take off the Sponge Filter.

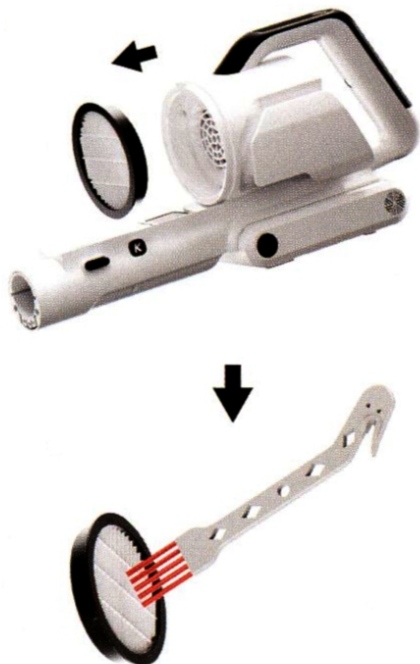

3. Rinse the Metal Filter and dust bin (if necessary) with cold water and allow them to dry. Make sure the parts are completely dry before using.

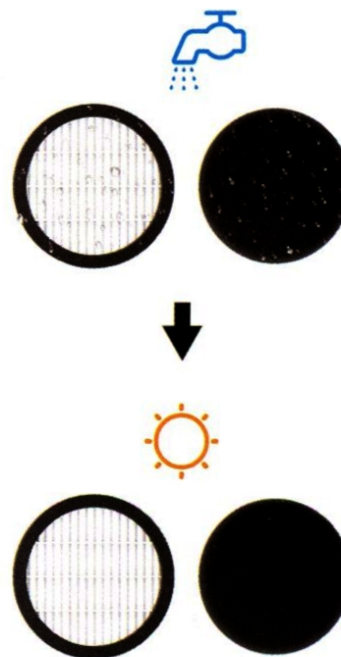

5 How to Clean the HEPA Filter

1. Take out the HEPA Filter and the Sponge Filter, clean the dust with the brush.

2. Rinse them with cold water ONLY, and air-dry for 24 hours. DO NOT use soap when cleaning the filters.

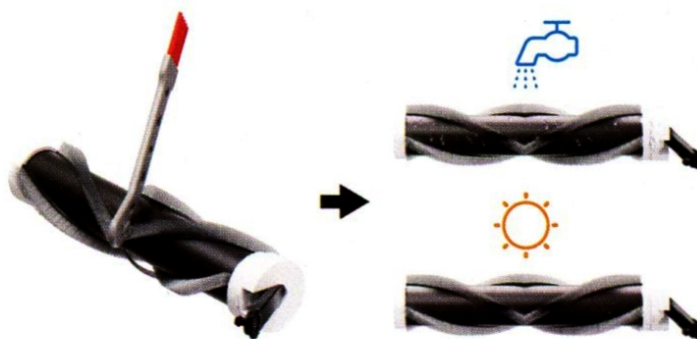

6 How to Clean the Roller Brush

1. Turn off the vacuum cleaner, press the button shown in the image below, and then pull out the roller brush.

2. If the roller brush is jammed or tangled, carefully use a tool to remove any hair or debris on it. Rinse it with cold water ONLY, and air-dry for 24 hours.

3. Insert the roller brush back in. Press the button to lock it in place.
